

Technical Note

2013-02001 Lionic Application Guard can block Mobile App UltraSurf (via WiFi)

1. Product

Lionic Application Guard Signature Database

2. Description

UltraSurf is a very sophisticated P2P software. It uses a distributed network of proxy servers, installed and maintained by volunteers around the world. Completely transparent data transfer and high level encryption of the content allow you to surf the web with high security. It uses port and protocol tunneling in order to trick security devices into ignoring it or mishandling it.

3. Versions Supported

1. Lionic Application Guard signature database can prevent the use of Mobile App UltraSurf since 02/01/2013.
2. Application Guard can block the following versions of UltraSurf for Mobile:
 - UltraSurf 1.1 (for Android)

4. How To

1. Enable block **Tunnel / UltraSurf** in Application Guard.
2. Enable block **Common / Fake SSL** in Application Guard.

About Lionic: Lionic Corporation is an innovative network security chip and IP design company. It provides optimal cost-performance solutions for network security products from 30Mbps SOHO devices to 4Gbps enterprise-level appliances.
